

From **LinkedIn Top Skills for 2016** Dashboard I have concluded below Insights:

1. By the Country ranking Skill Globally the Top Skill which is in highest Demand is **Cloud and Distributed Computing** at 1st ranking and the Statistical Analysis & Data mining is 2nd preferred Skill set in year 2016.

2. The **Storage Systems and Management** is the least in demand Skill on Global scale ranking at 10th position in a year 2016 which can be seen in above image. Even though the skill **Storage Systems and Management** is at 10th position on Global scale, however, in Countries like India and United States its rank is 4th. Also in Brazil and Canada it's on 5th Rank. It draws the fact that this is also sought after skill in year 2016, shown below:

3. Looking at **User Interface Design** Skill shows the ranking as below average or less than or equal to 5th position in most of the countries and Globally ranked as 5, whereas this Skill is in High demand in India ranked on 2nd position making it valuable skill in this country. Which can be depicted from below screenshot
